

How to Add a Shot

If a shot is unrecorded, you can add it in the ClubHub app. Adding a shot can be done during the round or afterwards. Use the procedure below to add a shot after the round is completed.

Let's get started...

1. On the home screen, touch **TRACK PERFORMANCE**
2. Touch **Recent Rounds** to see a list of your rounds.
3. Touch the round to which you will add a shot then find the hole.
4. At the map screen, you'll have a choice.

You can touch + (figure 1a) to go directly to the Add Shot screen.

Alternately you can touch "List" if you prefer viewing your shots in a list then touch + (figure 1b) to add a shot.

Figure 1a.

Touch + to go to **Add Shot**. Touch List if you prefer a list view.

Figure 1b.

Touch + to go to **Add Shot**.

The **Add Shot** screen shows each numbered shot. The tee shot is designated by the ClubHub logo (figure 2).

5. Touch the screen where you hit the missing shot FROM, not where the shot landed (see "Background Information" above for an explanation). An un-numbered marker will be placed on the map at that location. You can use a pinch-out gesture to zoom in. If you want to adjust the location touch the screen again.

6. Now that the location of the shot is marked, select the shot number, by touching **Shot # select** (figure 3).

Figure 2.

The arrow indicates the location where the missing shot was hit from. Touch here.

Figure 3.

To number shots correctly, touch **Shot # select** and enter the number for the added shot.

In this example, shot number 2 was selected (figure 4). Notice that the shot markers have been updated.

7. To choose the club used touch **Club select**. Touch the club used from the club list.

Figure 4.

The second shot was missed.

In this example, the attack wedge was chosen (figure 5). If the shot isn't in the right location, you can still move it by tapping the correct location. Remember, pinch-out to zoom is available.

Figure 5.

The shot number and club used for the second shot are filled in.

- When all of the information for your shot is correct touch **Add** in the upper right corner (figure 6).

Figure 6.

Touch **Add** to complete the shot addition.

Figure 7a shows the added shot in List view.
 Figure 7b shows the added shot in Map view.
